**Summary:** An Act providing a bill of rights for people experiencing homelessness (House Bill 1314 and Senate Bill 816) would establish a definition of homelessness and protect key rights of all residents, whether or not they are experiencing homelessness. The bills are modeled after landmark legislation passed in 2012 in Rhode Island. Similar legislation has passed since in places such as Connecticut, Illinois, and Puerto Rico.

**Bill Status:** The bills were refiled in January 2019, and currently are assigned to the Joint Committee on Children, Families, and Persons with Disabilities. The committee is expected to take action on the bill on or before March 18, 2020. These bills are very similar to legislation filed by Senator Nick Collins, Senate Bill 784. Despite considerable support, the bill did not pass last session. We are hopeful that the momentum from last session and the pressing need to uphold human rights and dignity will propel the bills forward this session.

**Why is it necessary to create a bill of rights for people experiencing homelessness?**

People experiencing homelessness often are subjected to discrimination and mistreatment based on their housing status. The bill of rights is a guide for state and local officials emphasizing that people experiencing homelessness are entitled to the same rights as any other resident of Massachusetts. The bill of rights seeks to outline those rights to prevent discrimination based on housing status. The legislation recognizes the increased prevalence of homelessness in Massachusetts due to widespread economic hardship, the insufficient availability of safe, affordable housing, and a weakened social safety net.

**“No person’s rights, privileges, or access to public services may be denied or abridged solely because they are experiencing homelessness.”** The rights specifically included in the bill of rights are the right to move freely in public spaces, the right to equal treatment by municipal agencies (such as police departments), freedom from discrimination in employment, the right to emergency medical care, the right to register to vote and to vote, freedom from disclosure of records, and the right to a reasonable expectation of privacy of property.

Through the bill of rights for people experiencing homelessness, we are seeking to have the rights outlined be treated as a statement of legislative intent, as a guide for state and municipal agencies.
